

How to Set Your Screen to Lock in Windows XP

1. **Right click** anywhere on your desktop and click **Properties** in the drop down menu
2. Select the **Screen Saver** tab
3. Make sure you have a screen saver selected – any screen saver will do
4. Check the box that says **On resume, password protect**
5. Enter the number of minutes to wait before the screen saver activates (we suggest 30)
6. Click **OK**
